SUMMARY

Final-year master's student with a strong interest in Supply Chain Management, automation, and industrial development within results-driven consulting organizations. I am motivated by taking on new challenges and look forward to contributing my skills. I appreciate a workplace that combines exciting challenges with opportunities for personal development.

EDUCATION

Linköping University

Master of Science - MS, Industrial Engineering and Management, Innovation Management — *2023 - Ongoing*
(Includes courses in Project Management, Operations Strategy, Lean, and Innovation & Change Management)
(Additional courses in Finance, Cybersecurity, and AI)

Linköping University

Bachelor of Science - BS, Construction engineering — *2020 - 2023*
(Included courses in Mathematics, Statistics, Leadership and Organization, Structural Engineering Calculations, and CAD Courses)

WORK EXPERIENCE

Supply Chain Intern — Jan 2025 – Ongoing

Lexington Company — *Stockholm, Sweden*

- Developing a deeper understanding of Supply Chain processes by analyzing and mapping flows, identifying areas for improvement, and creating and refining forecasting models to optimize production and inventory management.
- Developed a forecasting tool using machine learning algorithms to improve forecasting accuracy and optimize the supply planning process.

Area Coordinator and Apartment Inspector — June 2023 – Oct 2024

Stångåstaden AB - Largest Rental Housing Company in Östergötland — *Linköping, Sweden*

- Managed administration and planning of property management to ensure that customer orders and needs for home maintenance and repairs were met. Worked closely with customers to address their needs and maintain good relationships.
- Conducted detailed inspections of over 40 apartments, reviewing safety and maintenance standards. Additionally, collaborated with a supervisor on approximately 20 additional inspections to identify areas for improvement and ensure compliance with set requirements.

Teaching Assistant in Steel Structures — Sep 2023 - Oct 2023

Linköping University — *Norrköping, Sweden*

- Supervised a class of 30 students in steel structure calculations, providing guidance during lectures and lab sessions to support their understanding and practical application.

STARTUP EXPERIENCE

Co-founder and CEO — June 2024 - Ongoing

Catalina Software Solutions AB — *Stockholm, Sweden*

- *Project 1*: Developed an Excel VBA calculation template for automatically and accurately calculating depreciation and charges related to apartment inspections, streamlining the process and reducing billing errors.
- *Project 2*: Developed a web application for AI-generated policies for sports clubs in Sweden, with features for account management, email reminders, and digital signatures. The application was primarily built with Next.js and TypeScript, along with Tailwind CSS and PostgreSQL.

COMMITTEE ACTIVITIES

Business Development — Jan 2024 - Ongoing

LIU Formula Student — *Linköping, Sweden*

- Contributed to the development of a system based on Python and Next.js for managing the Bill of Materials (BOM) for components in the Formula Student car and played a key role in designing a business strategy as a member of the cost and business team.
